

Guide for the using the NHSEI antibiotic work searches in Systm1

All the searches are relative, meaning the search period moves on a day at a time.

How to import the searches:

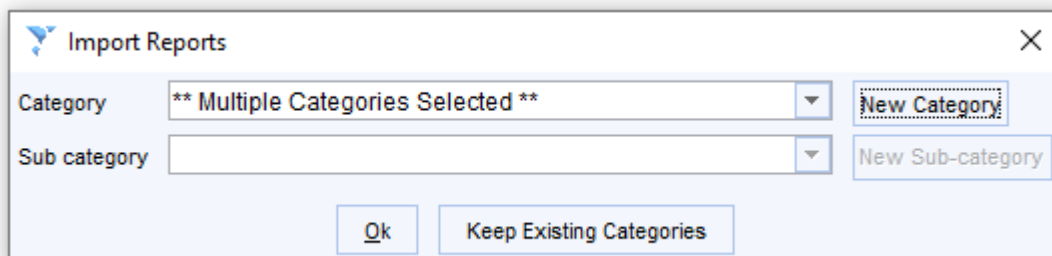

Select Reporting from the main toolbar, then Clinical Reporting

Click Import

Select the search file which you have previously saved on your computer

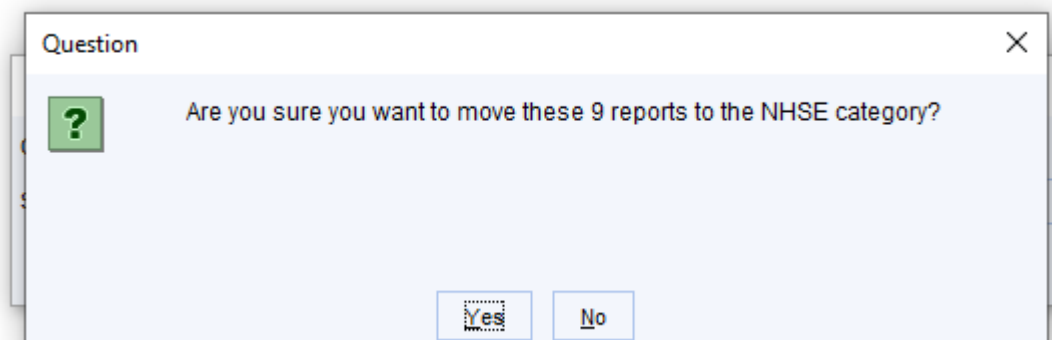

Click Ok

Select where you want to save the searches or select a new category (see below)

The 'Import Reports' dialog box features a title bar with a blue icon and a close button. It contains two dropdown menus: 'Category' with the text '** Multiple Categories Selected **' and 'Sub category' which is currently empty. To the right of these dropdowns are two buttons: 'New Category' and 'New Sub-category'. At the bottom of the dialog are two buttons: 'Ok' and 'Keep Existing Categories'.

Select yes (see below)

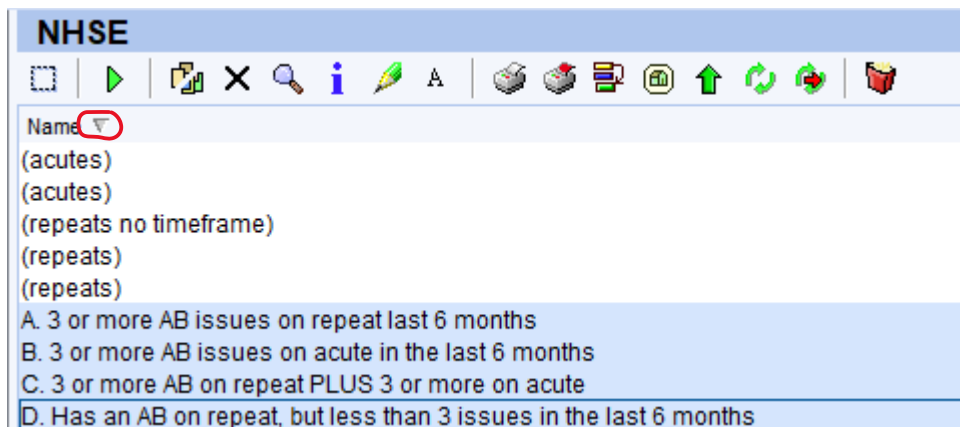

The 'Question' dialog box has a title bar with a close button. It contains a green square icon with a white question mark. To the right of the icon is the text 'Are you sure you want to move these 9 reports to the NHSE category?'. At the bottom of the dialog are two buttons: 'Yes' and 'No'.

Click on the triangle next to name to sort into the order as below.

Searches in brackets are not to be used.

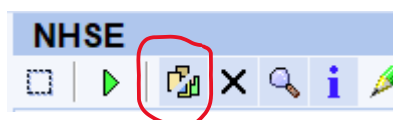

Use searches A-D

Search A:

Identifies patients with 3 or more antibiotic issues from a repeat template in the last 6 months.

The report maybe broken down by drug, select breakdown report – circled below

Breakdown by drug name – under repeat templates (see below)

☒ A. 3 or more AB issues on repeat last 6 months (NHS)

☐ Derive a breakdown option
☐ Item Count
☐ Percentage of the total

☐ Current Referrals In
☐ Demographics
☐ Record Sharing
☐ Registration
☐ Relationship
☐ Risk Factors
☐ Strategic Reporting ID

☒ (repeats) (NHSE)

☐ Patient Count
☐ Current Referrals In
☐ Demographics
☐ Event Details
☐ Record Sharing
☐ Relationship
☒ Repeat Templates (1)

☒ Drug
☐ If repeat template is linked to a coded entry
☐ Repeat issue count
☐ Repeat template end date

View patients and sort by NHS number, this will show some patients will have multiple antibiotics on repeat issued in the last 6 months.

Search B:

Identifies patients with 3 or more antibiotic issues from an acute issue in the last 6 months.

Breakdown search in a similar way, but by drug and issue date.

☒ Issues (2)

☒ Drug
☐ Drug ID
☐ Issue duration
☐ Issue end date
☒ Issue start date
☐ Medication type
☐ Product Type
☐ Repeat drug

Search C:

Identifies patients with 3 or more antibiotic issues from an acute issue AND with 3 or more antibiotic issues from repeat in the last 6 months.

Search D:

Identifies patients with an antibiotic on repeat, but less than 3 issues in the last 6 months.
